

Accessibility Statement

Our WCAG 2.2 AA target, what already works, known gaps, and how to tell us when something fails you.

Version 1.1 | Effective 28 July 2026 | Transparency

Owner Obedience Global Ltd board | Approved by Obedience Global Ltd board on 28 July 2026

Approval state company-approved | Next review 28 October 2026

01 Our target

We build toward WCAG 2.2 AA across our websites and products. As a UK company we take our Equality Act 2010 duty to make reasonable adjustments seriously, and we treat accessibility as an engineering requirement, not an afterthought.

02 What is built in today

- Full keyboard navigation with visible focus states
- A one-click "Reduce motion" control in the footer calms all site animation; the loading screen and custom cursor additionally stand down for the OS reduced-motion setting
- The custom cursor is decorative and disabled for touch, coarse pointers and reduced-motion users; native cursors and affordances remain
- Semantic HTML landmarks, labelled forms, and alt text on meaningful images
- Colour contrast checked against AA on text and interactive elements

03 Known limitations

Some decorative motion and canvas-style effects are still being audited against every assistive technology combination. If anything on our sites blocks you, that is a defect: tell us and we will fix it.

04 Feedback

Email hello@obedience.global with the subject "Accessibility". We respond within 5 working days.
